_____

Profile:

I've decided to practice software engineering according to my interest as I'd like to dedicate my knowledge in this domain to create applications that could serve the community and the organization, I'd work. In addition, I like to conquer different fields in this domain where I would widen my knowledge and create apps that would have a good impact.

_____

Education:

2013 - 2017	B.Sc. in Computer Science in Information Technology Cairo University, Egypt. Overall Grade: Very Good GPA 3.01/4

_____

Professional Experience:

Feb 2020 to Present	Mobile Developer at Fudex - working in many applications designing and developing using react native. - working on enhancement of old applications, fixing bugs, and uploading a new version. - working to build many applications using Flutter. - Providing support for the rest of the team.
June 2022 to Present	Mobile Developer at Serve - working in Serve application and Serve Provider application designing and developing using react native.
Dec 2018 to Dec 2019	React Native Developer at New Concept
Sep 2016 to Dec 2016	Android Development (intern) at Google and MCIT

Cross-platform React Native:
- Have worked using react native framework to create applications that serve business needs in various domains such as e-commerce, Social, education, tracking, and marketing.
- I've specialized in mobile development creating responsive designs leveraging different technologies and the latest react native components that enhance the functionalities of the applications as I.

- Contributed to creating responsive UI components, and managed applications' states with redux.

Android Development:
- Worked as mobile applications developer in creating android apps
  That serve different purposes like education and lifestyle.

_____

Qualifications:
- Able to deploy applications to both App Store and Google.
- Strong knowledge of React Native and ability to write native modules with CLI.
- Strong knowledge of using Firebase services for push notifications.
- Applied socket communication for different purposes like chat and notifications.
- Implemented tracking use cases using react-native maps alongside the GPS tracking components.
- Strong knowledge of a Source Control like Git.
- Skilled in programming languages such as Java, Javascript, Python, and C++.
- Professional in android application development after creating several android apps in different domains.
- High experience in react js and react native development since joining the cross-platform application development field.
- Strong knowledge of data structures and object-oriented programming.
- Good awareness of big data and cloud computing concepts.

_____

Tools:
- Visual Studio Code, Android Studio, XCode GitHub, Pusher, and Firebase.

_____

Language Skills:

- Arabic: Very Good

- English: Good
